17" High

- All columns 4" square x 1/4" wall structural steel tubing
- 9" square x 1/2" thick steel base plates
- Base plates have four 7/8" round anchor holes
- Floor anchors provided.

Double Rail

43" High

RAIL LENGTHS

- 11-gauge formed steel rails
- 10 widths, 1' to 10' in one foot increments
- Custom lengths are also available

HANDRAILS

System 22 HandRail is an excellent railing system for active aisle ways and shipping dock areas. This 2" square steel rail system bolts up with standard hand tools.

SIZES AND LENGTHS

- System is designed on 8'-0" centers and comes in a standard two-rail-style.
- Rail sections combined with 6" run post connections or 4" corner/end posts to lay out on 2', 4', or 8' centers.
- The top rail is 42" high with the mid-rail centered 20" from the floor.
- Rails and posts are constructed of 2" square, 14 gauge steel tubing.
- Posts have a 4" x 4" base plate with 7/16" diameter mounting holes.
- A 4" high Kickplate can be added as an option.
