Aerosol Storage Cages

BENEFITS

Improved Safety

Aerosol storage cages are designed to provide a secure and safe storage solution for aerosol cans. By storing aerosol cans in a cage, you reduce the risk of accidental punctures, leaks, or explosions, which can lead to serious injuries and property damage.

Compliance

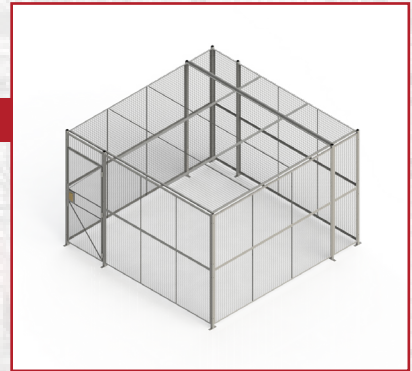

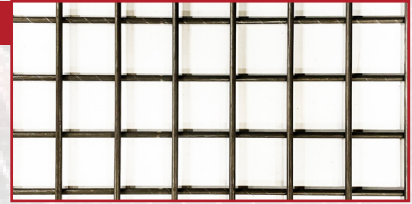

In some industries, such as the industrial or chemical sectors, storing aerosol cans in a storage cage may be required by law. By using an aerosol storage cage, you can ensure that you are compliant with these regulations.

Durability

Aerosol storage cages are made from 1-½" Square 8 Gauge Woven or Welded Wire Mesh, making them durable and long-lasting. This means that you can rely on your storage cage to protect your aerosol cans & employees for many years to come.

SPECS

- 1-1/2" Square 8 Gauge Woven or Welded Wire Mesh
- Custom heights available up to 50' that span to roof decks
- Wall panels mount to posts flush to floor
