LIGHT CURTAIN ENCLOSURES

Key Features

- **Enhanced Impact Resistance:** 3 1/2" square high strength steel tubing with durable 3/16" wall thickness protects light curtains from being damaged or knocked out of alignment.
- **Compatibility:** Designed to accommodate a wide range of light curtain manufacturers and models.
- **Baseplate:** Heavy-duty 6" x 6" x 3/8" steel base plate with integrated sub-plate, allows for precise axial alignment
- **Seamless Integration:** Can function as a stand-alone unit or easily be tied into WireCrafters RapidGuard® II or 840 machine guarding system.
- **Custom heights available upon request.**
